Education

Degree / Exam	Institution /Board and Year	CGPA / %
B.Tech(CSBS)	Netaji Subhash Engineering College , Kolkata(2023-2027)	7.33
Class 12	Guru Gobind Singh College, Patna, Bihar (2020-2022)	77.2%
Class 10	St.Paul’s Academy , Patna, Bihar (2020)	79..2%

Technical Skills

- Programming Languages:** Proficient in C, C++, Python, JavaScript, and SQL
- Backend Development:** FastAPI, Node.js, Express.js, RESTful APIs, Socket.IO, WebRTC
- Artificial Intelligence:** Generative AI, LangChain, LangGraph, RAG, Prompt Engineering, Vector Databases
- Frontend Technologies:** HTML, CSS, and React.js
- Database Management:** MySQL and MongoDB
- Developer Tools:** Git, GitHub, VS Code, and Postman
- CS_SUB:** DSA, OOP, DBMS, Computer Networks, Software Engineering, System Design (LLD)

Coding Profile

- LeetCode 300+ (1491) • HackerRank 4★ C • CodeChef Bronze

Projects

- Krishna_AI** (Python(FastAPI), LangChain, Google Gemini API, React)  [Source Code](#) [Live Link](#)
Built an AI-powered chatbot that answers life and philosophical questions using Bhagavad Gita–based context, leveraging Google Gemini API, prompt engineering, and a simulated RAG pipeline to deliver relevant, grounded, and meaningful responses.
- Real-Time Chat App** (MERN)  [Source Code](#)
Built a real-time communication platform supporting instant messaging and peer-to-peer video calling, using Socket.IO for low-latency bi-directional chat and WebRTC for secure video calls, with a responsive UI, RESTful backend APIs, and efficient real-time communication handling.
- Inventory Management & Alert System** (Node.js, Socket.IO, Redis, PostgreSQL)  [Source Code](#) [Live Link](#)
Built a real-time inventory management system to monitor stock levels, manage inventory, and trigger automated alerts based on reorder points and inventory thresholds, leveraging Socket.IO for event-driven notifications, Redis for caching, and PostgreSQL for data storage.
